CENTS AND HALF CENTS.

This set of Cents and Half Cents merits the attention of collectors of these series, and will amply pay any one viewing the collection, to examine the pieces minutely, and detect, if possible, any misrepresentation of their condition. They are, if anything, under, than overrated, and although special notice is drawn to the Cents and Half Cents, the rest of the collection is none less worthy the same claims of observation. Parties not attending the sale can trust with entire confidence as to the truthfulness relative to condition, and doubtlessly be agreeably disappointed upon receipt of the pieces ordered.
